What are the record 24-hr snowfalls by state in the U.S.?

Snowfall records by state in the U.S. (24 hours)

NOTE: Extreme snowfall amounts are notoriously variable across a region, especially in the mountains, so since there are relatively few official snowfall observation sites, most of the following records have likely been exceeded at other locations and times.

State	Location	24-hr Snowfall	Date
Alabama	Walunt Grove	20.0 in.	March 13, 1993
	Heber Ranger Stn		December 14, 1967
Arizona	Alpine	38.0 in.	February 25, 1987
