Monthly and Annual Precipitation for the Year 1932, with Departures from the Normal

Table with columns for Stations, months (January-December), and Annual. Rows are categorized by Tidewater, Middle Virginia, and Great Valley. Each station entry includes precipitation and departure values for each month and the annual total.

Note.—In this publication, annual means are computed from data for all stations; whereas, in monthly reports, means may not include all stations, as in some cases reports are not received in time to be used in the computations. All means include the interpolated values. Errata: December 1932.—Diamond Springs, maximum temperature on the 24 should be 70; mean temperature, 50.6; departure, +7.0. Christchurch, lowest temperature, 14, on the 19th. North River Dam, monthly snowfall, 14.3. Onley, days with .01 or more precipitation, 11. Woodstock, mean maximum temperature, 47.1; mean minimum, 25.3; mean monthly, 36.2. Highest temperature for State, 80°, at two stations on 3rd. Late Reports: Dahlgren.—Mean temperature, 41.2; highest, 69, on the 6th; lowest, 15, on the 16th; precipitation, 3.33; greatest in 24 hours, 0.85 inch.
