

Meteorological Report for June.

The sub-joined table gives the readings of the thermometer, the course of the wind at sunrise, and the amount of rainfall for the month of June. The readings of the thermometer were taken in an elevated position, free from any influence of refracted heat, and from French instruments, showing the highest and lowest points of the mercury during each twenty-four hours. It is believed that no better situation for observations of this character can be found in our vicinity. They have been carefully noted, and are believed to be absolutely correct.

CONDITION.	Minimum.	Sunrise.	Maximum.	Wind.
1—Partly cloudy, rain at night.....	61	61	83	W.
2—Cloudy.....	60	60	83	E.
